Manufacturer and distributor of ball valves and mass flow meter.

## About Us

Deshwaan System (DS) was founded as a manufacturer and distributor of flow meters and flow monitoring equipment.

DS is one of the leading manufacturer of Oscillating Piston Flow Meters, Positive displacement principle for use on all liquids, to be accurately measured.

We guarantee absolute precise measuring with our own engineered electronics at a very reasonable price.

With the advanced technology and design, our client list has grown quickly, catering to the requirements of several industries like Oil & Petrochemicals, Aeronautical, Cement, Pharmaceuticals, Chemicals, Food, Water, automobile, textile, beverage/distillery, construction, bottling and water treatment to name a few.

Over the years, DS has emerged as one of the leading manufacturer and distributor in the flow control industry.

Today our product line includes the most complete line of flow meters, monitors, sensors, computers and controllers available in the industry.

While our business has grown over the years, our focus - satisfying the customer - has remained the same. Let us use our technical expertise and real-world pragmatism to respond to your needs today.
