About Us

Axim Automation Technologies is a Company established by experienced professionals from Automation industry with a view to provide Quality Engineering services. It is a progressive, Technology Oriented company providing solutions with highly motivated and experienced team that has excellent track record of Application Studies, System Selection, Configuration and Commissioning.

Our core strength lies in the spectrum of domain knowledge and experience that its developers, quality control experts, and project managers have acquired collectively in the field of automation technology.

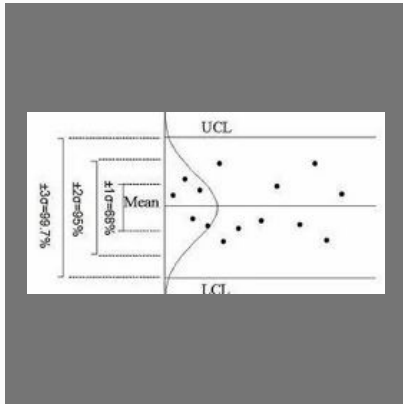

While on one hand, we continuously keep sharpening our skill sets; on the other hand we keep upgrading our knowledge to absorb the emerging technologies to cater to the demanding needs of our customers. We have subject matter experts on all major platforms and across a number of industry verticals where automation solutions are a critical component of the production process.
