About Us

We are manufacturer of imitation jewellery raw materials. i.e. fancy , fancy pipes, brass cuttings etc. since last 25 years. since last 7 years. We expanded our business in great extent, now we are in making of fancy ready jewellery i.e. bangles, necklaces, Victoria sets etc. and other accessories. We also deal in brass components and fancy items used in clothing's and garments. We are committed to provide greater satisfaction to out customer and expect their support so we can create products as per new samples and designs. **Brass**, as a metal, has found a lot of usage in the commercial fashion jewelry market. It is an alloy with 70% copper and 30% zinc. Brass a **non-ferrous** metal being malleable and ductile has got excellent cold-working but poor hot-working and machining properties. It is excellent for soft-soldering, good for **silver alloy brazing** or **oxyacetylene welding** and fair for resistance or carbon-arc welding. Attractive jewelry is handcrafted from the metal brass and ranges from the sophisticated, modern items to exquisitely crafted designer ones. Brass fashion jewelry made in a medley of designs and finishes is exported the world over.
