## About Us

Dr.Jha knows that even though medical science is able to cure people of many such diseases which were leveled as incurable so far, there are many symptoms and diseases for which there is no effective cure. Moreover, the treatment is getting costly and out of the reach of so many people today. Door step and online health evaluation and monitoring can save time, money, energy, limbs and many lives. This can be possible only with the unique software which Dr.Jha has personally designed after nearly 10 to 15 years of continuous effort and dedication. Apart from medical treatment by the best doctors online and by personalized care, he is introducing a unique method of 'Energy Psychology' which is based on the notion that most of the diseases are the result of negativity, stress, hopelessness and lack of love among human being. He has been using this method to treat patients of many diseases and complaints for which no amount of medicine or any surgery is possible or beneficial. He is being assisted in this effort by many colleagues over the years.
