About Us

Having born in the year 2003 ours is a progressing institution where in we train the young minds through the play way and project method. The excellent trained staff follows the Montessori Method to train the tiny tots. We have said bye-bye to formal exams up to class V but still assure that our students would turn out successful in their board exams as well as the other public exams. Many new as well as old minds have joined in to bring out the Choithramian culture out of a wide variety of students. Here we are moving with a greater pace & trying our best to provide a healthy & open atmosphere to the students.
