About Us

CLINOVEX – Clinical Research Solutions located in cochin, India is a premier Research & Training institute in clinical & biomedical sciences providing high quality, innovative approach to both Research & Training. It is obvious that the area of clinical research holds immense scope and promise, as without the supporting data, drug launches are not feasible. Further bringing a new drug to market is enormously expensive and time bound. Realizing all these factors, we at CLINOVEX work effectively and diligently to manage all critical aspects of the study to ensure on-time delivery of results, within budget and with the highest possible quality output. Having sound scientific basis in both conception and execution, our team of professionals will work with you on all aspects of the trial from the first regulatory submissions through to closeout and final reporting to help you and your project succeed. Now CLINOVEX has ventured in to the academic arena in order to cater the manpower requirements for the pharmaceutical and healthcare industry. Thus we have commenced DCRM - Diploma in Clinical Research Management.
