About Us

The founders of Indus Health Plus realized that in India, people did not embrace the concept of preventive healthcare. Yet this neglect caused untold financial hardship and physical misery to those afflicted with serious chronic illness like cancer or heart disease etc.

To counter this trend, Indus Health Plus was established in the year 2000 to spread awareness about the value of preventive healthcare - and to make quality healthcare accessible to all.

Using the latest in diagnostic technology, a series of comprehensive preventive health checkup packages were created to suit every budget.

Simultaneously, realizing that selling this concept would require a radical shift in thinking, it was decided that the best solution to market these packages lay in network marketing. A system where the concept is explained one on one by trained distributors who we call Indusites. This has created a profitable business model for tens of thousands of people over the years.
