

Construction Equipment Co.

Construction Equipment Company (CECO), a formidable name in bridge bearing industry, was established in year 1989.

About Us

Construction Equipment Company (CECO), a formidable name in bridge bearing industry, was established in year 1989. It is India's one of the leading companies engaged in designing & manufacturing of all types of bridge bearings, expansion joints and allied products. The company is managed by young, enthusiastic strong technocrats, who are assisted by the vibrant team of engineers in marching towards the vision. We by now have countless satisfied customers in India and neighbouring countries. The vast experience in the industry has strengthened the CECO team to design & develop bridge bearings, expansion joints with indigenously adopting latest technology.

Established in 1989, CECO is a well-known name in the joining technology for building bridge structures. CECO is one of India's leading companies engaged in designing and manufacturing all types of bridge accessories. CECO is one of the first bridge bearings manufacturing companies in India to be certified with ISO 9001:2000.

CECO is proud of being an integral part of several prestigious projects in India and neighbouring countries. Today, CECO is being preferred over its competitors by several leading EPC companies and consultants. This is simply because its high-quality products of most competitive prices are delivered on time to various project sites even in the remotest part of the country. With this reputation, we are an inseparable part of the vast network of rail and roads in...
