We are manufacturers, dealers and service providers of AC & DC Drives, Soft Starters, PLC and MCC & PCC Panels. We are known for our engineering strength, detailed engineering & CAD drawings, state of art manufacturing.

About Us

Established in the year **1990**, we, '**Comtech Automation Systems**', are known for manufacturing, importing, exporting and trading a comprehensive range of **AC Inverter Drives, Control Drives, Vector Control Inverter Drives, Micro Size OEM Drive, Inverter Drives, DC Drives, Programmable Logic Controller LX Series, LX7S Programmable Logic Controllers, LX7 Programmable Logic Controllers, LX70 Programmable Logic Controllers, LX700 Programmable Logic Controllers, Power Pannels, MCC Panels, PCC Panels, Refurbishing & Retrofitment, SCADA & Automation**. Appreciated for their low maintenance, low power consumption and reliable operation, these products are sourced from leading and authorized manufacturers like Larsen & Turbo and other organizations. These precision automation and electrical products are manufactured with the use of premium grade raw material and latest methodologies. Furthermore, we make sure to test these products on varied parameters before sourcing from the vendors. Available in different specifications, these products are uses in host of industries. Available in custom-built designs, our products are engineered with perfection keeping in mind the prevailing industry standards. Furthermore, our vendors have set up an advanced R & D unit, which facilitates them in developing new and latest methodologies for the production of these products. With the help of our widespread distribution network, we have been...
