About Us

Welcome to Mystiq Garden

We grow a variety of fruits and vegetables in its expansive farm and is on its way to producing other grains and crops. However, Mystiq Garden does not intend to just sell. Its larger purpose is to make people aware of the benefits of eating chemical free food. It partners individual and organizations in their quest for healthy meals on their plate. Vijay Yelmalle also runs CRAFT, where he teaches city people to become urban farmers effortlessly while fulfilling their dreams of growing their own food. Moving along with the times, Mystiq Garden uses technology to its benefit to monitor and grow crops that are more nutritious, more healthy, grow quickly and safely without having to use pesticides or harmful chemicals.
