About Us

DAIA is an innovative consultancy group started with a vision to provide services that creates high-levels of measurable business value to customers. The process excellence program at DAIA is driven by LEAN methodology for reducing waste in business operations with stress on continuous incremental improvements in each stage of a business process. We provide services in the fields of Data analysis, Waste minimization, Environment impact assessments and Data entry. We have a number of expert data analysts, including Ph.D. statisticians, mathematicians, environment science experts, ISO auditors and various other highly qualified professionals. With our well established quality processes and stringent standards adhered to all our projects, we ensure that our customers are always at an advantage in terms of reduced risk, increase in efficiency, and optimum resource utilization. The project selection takes into account amount of effort, risk and possibility of success in a reasonable timeframe and direct impact of results on profits, customer satisfaction and business growth DAIA believe that at the beginning, during and after any piece of analysis, there should be interaction between all involved parties to ensure that results are fully understood and can be easily integrated into the business. Most of the projects relate to reducing defects (failure to deliver what the customer wants) or reducing Product or Service Non Compliance or Non conformities (as per specifications or...
