About Us

Datavision, since its inception, has persistently worked on accomplishing one milestone after another. Established in 1991, specializes in **ONLINE/OFFLINE range of U.P.S. systems** and other power conditioning equipments i.e. **Digital invertors, Digital and Analog Transformers for A.C., Refrigerator and Mainline** and **Servo Transformers**.

Our main stress is on the quality of the products that we may supply to our esteemed customers. We continue to remain at the helm through rigorous research and development. R&D labs at New Delhi and Amritsar explore and reinvent existing products and designs. State of the art production units ensure consistency and quality throughout the product range.

We have Sales Offices at New Delhi, Ludhiana and Amritsar and we are privileged to have extensive dealer network across North India and over one lac satisfied customers including various embroidery & knitting units, rice shellers having Sortex machines, electronic weigh bridges, multi speciality hospitals, many corporates institutes. government and semi-government departments. We are one of the very few manufactures of India who produce complete range of any rating in single phase as well as three phase ONLINE U.P.S. and SERVO TRANSFORMERS.

With an objective of reaching out to different water needs of the society, the company has diversified its portfolio with the complete range of domestic as well as agriculture energy saving water pumps.
