## About Us

We at Deccan Engineering Enterprises, a firm with 35 intense years in the field of specialty body building have a history of delivering vehicles with superlative work done. We played a role in the Indian representation at the prestigious Hanover Trader Fare as far back as 1985. Always at the forefront, we were the first to install an L&T make combined dispensing unit on a vehicle with a PTO drive (hence providing the same reliability & accuracy of the regular Petrol Pump without an electric motor) . We are an ISO 9001:2000 company, which further enunciates our dedication to quality". With over 2000 vehicles to our credit, Deccan vehicles on the road today carry a combined payload of 20,000 tons which is equal to the total tons of grain donated by Russia for the Tsunami hit countries!! This website showcases a sample of the different types of works we have done for various organisations across the country. Do look through and whatever your queries or needs, do feel free to contact us for as we've said, you are our very reason for existence. The core values of the company are : 100% Customer satisfaction ( Not 99%) International Benchmarking Continuous innovation and improvement Keeping
