About Us

Established in the year **1993**, at **Ludhiana (Punjab, India)**, we "**D. M. Engineering Company**," are a well-renowned **manufacturer, exporter and supplier** of a superior quality array of **Precision Machine Tool Accessories, Milling Accessories & CNC Tool Holders and Industrial Hand Tools**. These products are designed and manufactured in accordance with international norms using high grade metal alloy and cutting-edge technology. In order to manufacture these products, we source supreme quality metal alloy from reliable vendors of the market. As per the specific requirements of our clients, we offer these products in various sizes and finishes. Offered products are widely demanded all across the world due to their features like accurate dimensions, high tensile strength, perfect finish, sturdy construction, corrosion resistance and durability.

We are backed by an avant-garde infrastructural unit that is well-equipped with the latest machines and technologies. In order to carry out business operations very efficiently, we have divided our infrastructure into different units such as manufacturing, quality control, R & D and warehousing & packaging. Manned by our team of highly skilled professionals, our up to date infrastructural facility make us able to undertake bulk and urgent orders of the clients and complete those in an efficient manner within pre-defined time schedule. By conducting...
