Gayatri Engineering Work

https://www.indiamart.com/dnrindustries/

We are engaged in manufacturing and supplying wide range of Resin Coated Quartz Sand & Resin Coated Silica Sand. With the help of our well-equipped infrastructure, we are able to fulfill bulk customer's demands on time.
About Us

DNR Industries came into being in the year 2012 and proved its competency as the known manufacturers, exporters and suppliers of Resin Coated Sand. Our product range comprises Resin Coated Quartz Sand & Resin Coated Silica Sand. In order to meet the critical application and needs of the foundry industry, we have specially developed our range, under brand name of DNR Resin Coated Sand. In this particular process, coated sand is utilized to make molds through dump box method and cores through shooting. Our products are known for the features such as better compressibility, fast molding, hot tensile strength, shelling proof, high purity, lesser defects related to glass and many more. Our products find application in ceramics, glass, refractory and many more. Free flowing resin coated sand is taken care and cured in core boxes heated at the temperature from 230-250 C from desired shapes. DNR Resin Coated Sand is resin coated quartz sand. Quartz is extracted from quartz mines nearby Hyderabad. This sand ensures tensile strength and less gas content. It shows low deformation and high refractoriness. Quartz sand coated with Shell Resin is comparatively more flow able and has a maximum resistance to lumping-up on storage and to peel back. We own a spacious warehouse where the products are stored safely in their actual form, for long time duration. Experienced warehouse personnel are working with us, which take care...
