## About Us

The core aspiration that makes D.Y. Patil University School of Dentistry different from other dental schools is our commitment to strike a balance among technical excellence in dental education, scientific judgment in assessing the dental literature, and emotional intelligence – that indefinable something more that people expect in a doctor, such as being ethical, sympathetic, and caring in their relationships, as well as comfortable with themselves and others in their environment. The D Y Patil University, School of Dentistry is able to aspire to this goal because of three major assets: **Size**. As one of the largest dental schools in the state of Maharashtra, catering to the education of many of our nation's dentists, and with an enormous number of patient visits per year, the School of Dentistry has unique resources. These resources mean an increased opportunity for students and increased opportunities mean professional growth and development, including unparalleled leadership opportunities and real-world experiences.
