About Us

Started as a small Start up, Eco-paradigm aims at inception and practice of eco-sensitivity as an attitude.

Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs. Our present day practices don't ensure a sustainable future we are responsible for evils like pollution of air, water and land which has costed us the depletion our precious resources.

We believe sustainable future could be initiated only through sustainable practices at individual grass root level. Lets all do our bit.

Keep a lookout for tips and information.
