About Us

Our origin dates back to four and a half decades ago at a time when the Nation's Road Transport was in its nascent state and the need for a flexible and faster transportation was imperative for its growth. Established in the year 1955, East India Transport Agency provided the growing economy with a greater access to the remote parts of the country by means of a faster and flexible mode of transportation. East India Transport Agency went public in the year 1984 and became EITA India Ltd . Today EITA is major force in the transportation industry. Our mission is to provide multi-specialist, end to end, cross-functionally integrated supply chain services that are customized to your specific business needs and designed to give you strategic competitive advantages. We focus on building long term relationships and continuously adding value to your business by anticipating your needs as your business evolves and grows so that we are a proactive business partner rather than a passive supplier of logistics services.
