We, Essel Controls, are a company that sweeps over the whole domestic market by developing the automatic program of the textile process as well as meeting the globalization of the world market.
About Us

As we all know that, **Textile industry** is a field of creativity as it is base for fashion industry. Weaving, knitting and embroidery are the major field which are closely related with fashion industry. But before 2-3 decade, creativity in design are depends on mechanical system of each and every textile machines. There is lot of limitations in those mechanical systems of particular textile machine.

In last 2-3 decade, there is huge development in technology of textile machines. Particularly computerization in textile machine has been increased. Now there is two things:

- Computer based machines with latest technology are very costly compared that of old mechanical system based machines.
- Its not easy to throw old machines in scrap and bring latest technology machines for all textile factories in every countries.

With the aim is to provide higher cost and latest technology solution to old textile machines at very reasonable cost with good quality of product and after sales service. We have established SL Embroidery System in **2004**. We are also providing solutions to OEM customers.

We, **Essel Controls**, are a company that sweeps over the whole domestic market by developing the automatic program of the textile process as well as meeting the globalization of the world market. The team of professionals at Essels Controlss collectively boasts a combination of professionalisms, youth, experience and...
