About Us

The foundation stone of, “Flaminco Refractories Private Limited”, was laid down in the year 1908, with a target to manufacture and supply optimum quality cement to the clients. Our pure cement are manufactured using the finest quality raw material, which is sourced from the reputed vendors of the market. With high binding strength, precise pH value and quick setting nature, our cement find their extensive usage in the construction purposes for railway tracks, tunnels, bridges, dams and roads, to name a few. Highly qualitative, our cement provides high strength and long lasting life to the buildings.

With the rapid economic growth of all economics the pressure on the existing infrastructure to perform is huge as no country is able to build new infrastructure in the scale required to meet the demands. Therefore the need to keep the existing structures functioning to maximize their utilization is inevitable. Specialized structural repairs and application methodology for such activities, to offer cost effectiveness and durability is still in the infancy stage.
