## About Us

Brain child of mine, that is, Raghunadh – Director of the Flogre International, has blossomed into something, called Flogre International, a small section of Nature nurturers. We are building our stance strong in the world of beauty, colors, fragrance, and an iota of Nature, in short called “Flowers.” I am partnered by Ms. Manga Tai, whose knowledge and expertise has helped to bring this idea and nurture it further. We are the Jasmine flower exporters in India. We are here to grow and procure flowers from across the country and the globe to give the best blooms from the lot to our customers. Flogre International dons the hats of explicit exporters and elite growers. We love to be engaged in all the variants of flora, but we are taking baby steps by picking these Premium Fresh Cut: Gerbera, Carnations, Gladiolus, Roses, and Jasmine, as our first steps toward the florist industry. We also take deep interest in growing flowers like Gerbera and Carnation. These blooms are grown on a farming area spread across three-acres at Pocharam. The flowers are grown in a poly house using the updated floriculture techniques and safety measurements.
