Gammon India is built on a legacy that has stood the test of time. Technological and design excellence, and a discerning eye for quality and safety are some of the characteristics that distinguish Gammon.

About Us

Gammon India is built on a legacy that has stood the test of time. Technological and design excellence, and a discerning eye for quality and safety are some of the characteristics that distinguish Gammon's tradition for perfection in its areas of operation. Gammon India is amongst the largest physical infrastructure construction companies in India. Its track record spans significant landmark projects built over several decades, with a prominent presence across all sectors of civil engineering, design and construction. It has a track record of building landmark structures, some of which have become iconic. This includes 'The Gateway of India', the piling and civil foundation work for which was successfully executed by Gammon as its maiden project way back in 1919. Besides its large scale of operations in the Construction and Infrastructure domain, Gammon has a dominant presence in energy business in which it operates in the hydro, nuclear and thermal power sectors. In fact, Gammon's association with the construction of nuclear power projects dates back to 1959 when it completed the Pre-Stresses Concrete (PSC) Ball Tank of India's first Atomic Reactor Plant in Trombay. Gammon's projects cover businesses and projects involving highways, public utilities, environmental engineering and marine structures. Gammon's expertise also covers the design, financing, construction and operation of modern bridges, viaducts, and metro rail,...
