## About Us

Our design philosophy has always been to work closely with the client on helping them realize their dream. Our designs almost always have nature wrapping around the built spaces with no clear boundaries, where one flows into the other and Interior spaces speak with nature and are drenched with light. Our aesthetic approach and design sensibilities are deep rooted in Indianess with a very simple form follows function approach. Spaces, functions and form are envisaged only after many long interactive sessions with the clients often interspersed with lunch/dinner and sometimes even masala dose timeouts. We love to experiment be it our choice of projects, material, techniques, and design approach. Many a times we have design juries within the office where the floor is thrown open and even the trainees participate in threshing every design. detail etc and what it results in is a combined col-lective experience of over 150 years experience. Our team has grown to encompass artists, product designers, sculptors, lighting designers etc who we liaison with closely to enhance almost every project.
