Gayetri Group

<https://www.indiamart.com/gayetri-group/>

We are a widely recognized **manufacturer** of precision engineered Components and Spare Parts for various industries by Machining, Casting and Forging. These are acclaimed for their application specific design and optimum functionality.

About Us

¿ In the late 1940s of newly Independent India **Mr. B.L. Patodia** and his two brothers laid the foundations of an industrial conglomerate. They initially established a trading business in jute commodities under the banner of **ASHOKA**. ¿ In 1966 the group expanded into the engineering field with the production of Pressure Die Casting of aluminum and zinc based alloys, considered to be a highly technical line in those days in India. ¿ The growing demand for components in industries like automobile, electrical equipment, office equipment, textile machinery, etc spurred them to this decision. ¿ By 1994 the group had grown into international operations with the export of its engineering products. MC Pvt. Ltd acts as a front organization for the group's international trading activities. ¿ **We have obtained ISO certification and met all its quality requirements.**

Today it employs a combined workforce of over 125 workmen and 20 staff members and executives to manage its operations. With a strong infrastructure and a sound financial base the **GAYETRI GROUP** is set to take quantum leaps of growth and play a vital role in trade and industry. The company thrives on the stringent quality requirements of this sector. Each component is made to meet the needs of accuracy, consistency, reliability and safety demanded. It is no mere coincidence that the company production philosophy is that of **?Quality and Reliability?.**
