About Us

Geodesic Techniques was founded in 1986 by our visionary founder Srinidhi Anantharaman, with the objective of offering technically superior solutions for steel intensive construction. Over the years, the company has built expertise in the integrated design, engineering, procurement and construction process. The company is led by a team of qualified and experienced professionals with over four decades of experience. Today, Geodesic has established itself as a leading provider of large span, pre-fabricated, steel-intensive and innovative structures including high-rise steel buildings, signature structures, commercial & retail structures, public Infrastructure utilities, Industrial structures and urban transportation systems. We are led by a team of qualified and experienced professionals with four decades of experience in civil engineering, architecture, mechanical engineering, structural engineering, construction management and contracts management. Currently, we have nearly 200 man-power in four offices across the country. Geodesic is committed to improving the quality of urban life through its proven capabilities in engineering and industrialized construction. We have entered into strategic tie-ups with international leaders to offer end-to-end world class solutions to our clients.

VISION

- To deliver innovative and sustainable solutions that win customers
- To achieve leadership in building urban infrastructure
- To create wealth and...
