About Us

Ghanshyam Steel is a credible Manufacturer and Supplier of wide variety of Flanges, Profile cutting products, etc. All our products are having wide applications in various industrial and engineering purposes. Our range of Flanges comprises of M.S. Flanges, Press Cutting Machine. Moreover, We make profile cutting from 6 mm to 40mm thickness, manufacture tractors-trolleys wheel plates by making circle cutting and make Press cutting from 50 mm O.D. to 178mm O.D and having thickness of 6 mm to 12 mm. Besides, we also provide the service of Press cutting of circles with help of Press Cutting Machine.

We offer comprehensive range of precision Flanges, which is primarily used for connecting different solid objects and allowing them the least angle of rotation. Our Mild Steel Flanges ensure the hassle free performance with the heavier gauzes and standard hole placement. We use good quality of raw material in the production of our flanges and other products.
