About Us

RM 04 Glenmark Cardiac Center, established in 1997, is a diagnostic center conducting the entire range of what are known as non-invasive diagnostic tests in cardiology using state-of-the-art equipment. These include ECG, Computerized stress testing, 2-D echocardiography and color Doppler, 24 Hr Holter monitoring, 24 Hr ambulatory blood pressure monitoring, Event recorder studies, Head – up tilt testing, Signal averaged ECG and a host of other advanced and specialized tests. We can proudly state that, we have become one of the premier referral centers in the country for conducting these tests. Our focus especially includes children with heart problems, and babies and children from all over the country are referred for echocardiographic evaluation to the center. Another major thrust of the center is in evaluation of arrhythmias i.e. people suffering from abnormalities of heart rhythm. We were the first to in Mumbai to offer services such as Ambulatory Blood Pressure monitoring, Head up Tilt test, Event Recorder and Signal Averaged ECG. The doctors performing the tests are all qualified cardiologists with extensive training and a experience spanning over 15 years each. Our sole mission is to provide quality non-invasive cardiac diagnosis.
