Globe Chemie

https://www.indiamart.com/globechemie/

We are manufacturers, suppliers and exporters of a comprehensive range of intermediates and organic specialties. Our specialty lies in multi-step synthesis of compounds that are not commercially available.
About Us

Established in the year 2004, Globe Chemie is one of the leading manufacturers, suppliers and exporters of a comprehensive range of Intermediates and Organic Specialties. Our forte lies in multi-step synthesis of compounds that are not commercially available. The organization is a part of the Bansal Group of Companies, which has a long tradition of building glass units for chemical plants and serving the pharmaceutical industry, defense sector and research centers by supplying a wide range of specialty chemicals. Our range of organic compounds and intermediates is formulated at a world class processing unit which has all the latest technologies and machines in place. The unit is efficiently managed by adept chemical experts and scientists who have years of valuable experience under their belt. An integral part of the infrastructure is the research and development wing which tracks latest market development and technological innovations. Also, we lay a lot of emphasis on quality of chemicals offered to the clients as it sets us apart from the rest of the players in the market. Our clients such as Lupin, Glenmark Pharma, Dr Reddys and Albany Molecular Research Institute are fully satisfied with the range of chemicals offered by us. Under the leadership of its mentor Mr. Puneet S. Bansal, the organization has carved a niche in the chemical industry. He is well supported by a team of competent and well qualified professionals...

OTHER SPECIALITIES

Isobutyl Boronic Acid

Chloromethyl Methyl Ether

4-Methoxyphenyl Boronic Acid

Semicarbazide hydrochloride
INDUSTRIAL HYDRAULIC CHEMICALS

- 4-Fluorophenyl Boronic Acid
- 2-Nitrophenyl Boronic Acid
- D-Phenyl Glycine Methyl Ester HCL
- Phenyl Boronic Acid
OTHER PRODUCTS:

- Azetidine Series Chemicals
- Maraviroc Intermediate Chemicals
- Fluorenyl Methyl Oxy Carbonyl Amino Acids
- Silane Derivative Compounds
OTHER PRODUCTS:

Boronic Acids and Esters Compounds

6-Methoxy-2-Naphthaldehyde

N-Boc- D- Alanine

N 3 Dimethylaminopropyl N Ethylcarbodiimide Hydrochloride
