Greenplast – a technological venture after a successful stint of over 30 combined years of real estate development business specialises in innovative recycling of multi layer plastic packaging films

About Us

Greenplast – a technological venture after a successful stint of over 30 combined years of real estate development business specialises in innovative recycling of multi layer plastic packaging films of PET/PE in the industrial recycling domain.

As a commitment towards reducing the effects on global warming we at Greenplast has wisely invested & developed zero carbon emission machinery with efficient Recycling Technology which enhances the delamination of multilayer plastic. Cutting edge technology & process innovation has enabled us to deliver highest quality of granules with almost similar properties of Virgin Granules at reduced prices thus resulting in significant cost reduction.
