

# Group L

<https://www.indiamart.com/groupl-bengaluru/>

GroupL is a comprehensive and multi-service facility management company. We help our clients increase profits and reduce risks by outsourcing their non – core business and focusing on their core business!

## About Us

Our approach to facilities management is unique. We work in partnership with our customers to understand their business needs, thereby ensuring that we deliver a flexible and diverse solution, every time.

Our flexibility allows our clients to respond to changing business conditions hence enhancing asset value and maximising returns.

One of the greatest benefits of using GroupL as your FM provider is that most soft services and a few engineering services are provided by directly employed staff. This lends us greater control and we can provide a more efficient solution translating into reduced costs and increased productivity.

While our core strength is our ability to provide end to end facility management solutions for our clients real estate, we also provide our soft services as individual service offerings. Our clients can avail of manned guarding, security training, commercial housekeeping, cleaning services and HR services as independent services.
