

Harjee Exports

<https://www.indiamart.com/harjee-exports/>

Manufacturer of wheel hub, brake drum, hub axle etc.

About Us

We are a dedicated group of professionals engaged in manufacturing and trading of vehicular, automotive hardware and food items in domestic markets for the last 15 years. During these formative years of our operations we perfected the quality of our design, product, production as well as delivery.

Today QUALITY remains our sole guiding principal in our business.

In the year 2001 we were ready to enter the International Markets which eventually we did. Ever since then we have not turned back. We have earned a good reputation as a manufacturer and an exporter in African continent especially in the Eastern parts.

At HARJEE EXPORTES we put our heads, hands and hearts together to translate quality into products. We would like to humbly boast about our customers utmost satisfaction doing business with us.

We undertake manufacturing of customized automotive hardware products, though our specialty remains with the manufacturing and trading of Wheel Hubs, Wheel Studs, Break drums, Wheel rims, and the likes.

The export consignments have to pass through a strict quality control regime under our direct control. We ensure to maintain high quality of material, design, and the final product.
