About Us

Harrier Information Systems specializes in providing perfect software solutions for the global financial services industry. We have our operations in India and the U.S.

The company derives its name from the word "harrier", which means a robust and versatile cross country runner who is determined to win regardless of unforeseen changes in the weather conditions. Similarly, our strength lies in our proven track record of excellence, irrespective of the most challenging of work situations.

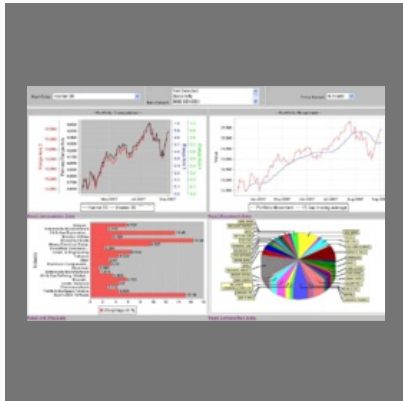

Our qualified and experienced team has expertise in developing cost-effective and user-friendly software for various industry verticals like Front Office Trading Systems and Integration of Broker/Dealer Management Systems. Whether it is Market Data or Index Computation, we offer innovative solutions for specific challenges. Our Xetra to FIXML applications offer the users an efficient and flexible tool for achieving the best execution to adapt easily to new standards.
