HEG Limited was established in the year 1977 in technical and financial collaboration with Societe Des Electrodes Et Refractories Savoie (SERS), a subsidiary of Machinery in France.
HEG Ltd., a premier company of the LNJ Bhilwara group, is today India’s leading graphite electrode manufacturer and exporter. It has one of the largest integrated Graphite Electrode plants in the world, processing sophisticated UHP (Ultra High Power) Electrodes. The company exports over 80% of its production to more than 25 countries of the world. The position the company enjoys today in India and abroad is largely due to its commitment to constant upgradation of its product quality to match international standards and to meet new challenges to win and excel in all situations. In Graphite, our focus is on UHP grade electrodes and we have expanded our product range. Today, we have years of experience in supplying quality UHP grade electrodes all over the world. The encouragement from our customers has led us to increase production capacity and become a significant global producer of quality UHP grade electrodes for EAF application. Our ability to source the best raw material from sources worldwide and the skills of our human resources have been the key to our growth. To maintain our competitiveness, we have set up a Captive Power Plant totaling more than 77 MW. As a responsible graphite electrode manufacturer, we continue to invest in technology, development of new products and in our human resources.

CARBON PRODUCTS

Activated Carbon Spheres

Carbon Tamping Paste

Soderberg Paste

Porous Conducting Carbon Papers
GRAPHITE PRODUCTS

Graphite Fine Grain Blocks

Graphite Fine Grain Rounds

Flexible Graphite Sheet

Graphite Pipes
OTHER PRODUCTS:

Carbon Blocks

Graphite Electrodes

Machined Graphite Components

Flexible Graphite Rings
