About Us

Established in the year **2011**, we, "**HI TECH CONTROLS**", are engaged in manufacturing and supplying AC Drives and Control Panels. Our comprehensive range consists of Electronic Panels, AC Drives and Control Panels. These products are manufactured using supreme quality raw material and technologically advanced machines. The panels offered by us are known for their features like low power consumption, easy installation, user-friendliness and trouble-free performance. Owing to these features, our products are extensively used in steel rolling mills, buildings, paper, automotive & textile industries. Our products are demanded for their features like corrosion resistance, fine finish and dimensional accuracy. Further, we are engaged in rendering textile machine parts to our respected patrons. Our professionals repair the products and make sure that these are functioning properly.

We have constructed an ultramodern infrastructure facility, which spreads over a large area. The unit is equipped with the advanced technology machines and equipment, required in servicing and production process. We have employed a team of competent professionals, which executes all the activities of the unit in a streamlined manner. These professionals hold vast experience and qualification in their respective domains. They work in coordination with the clients to understand their specifications and accordingly offer the products as well as services. Further, we have a team of...
