HygieneTreat is an environment friendly deep cleaning, sanitizing and deodorizing plan for your most favourite place, i.e., your home. We provide maintenance services as well.

About Us

HygieneTreat is an environment friendly deep cleaning, sanitizing and deodorizing plan for your most favourite place, i.e., your home.

This has origin to problems we faced in our dwelling. We have a part-time domestic help working with us for five years. Though none of us were happy with her cleaning work, we are unwilling to fire her because of her honesty and poverty.

We have tried with couple of deep cleaners, but their services didn't come up to my wife's expectation as she is allergic to dust. I don't require an instrument to measure the amount of dust in my house as my wife would sneeze at the hint of dust. It is not just dust but also germs, dust mites and stains.

After interacting with few people in my community with similar problems, we decided to do something about it. If we could solve the problem in our home, we can help many in this community and probably entire Bangalore.

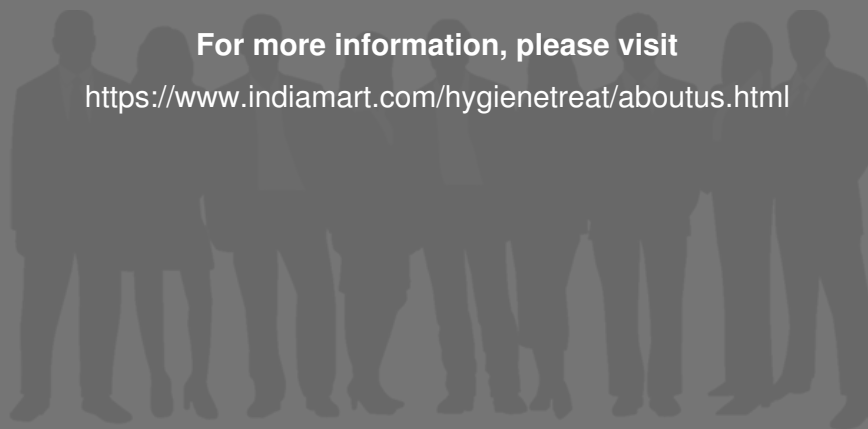

When we thought of investing, the first question that flashed into our mind is why would anyone hire our services? We deliberated and worked hard on this question and now have good reason to believe that we are different from others.

Our USP's are environment friendly, conserve precious water, no man made harmful chemicals, instead, use GOD made products like water (in the form of pressurized steam) cotton, lemon, salt etc.

Steam can kill 99% of bacteria and viruses like Salmonella, E. Coli, Influenza A,...
