Image Core Labs providing Imaging Acquisition, Image Processing and Analysis, Data Management, Oncology, Neuroimaging, Musculoskeletal Imaging and Clinical Trial Technologies etc.

About Us

Image Core lab (ICL) is a premier Imaging service provider exclusively focused on providing high quality specialized imaging service in Bangalore committed to assist Sponsor companies and CRO's with their imaging requirements as they discover/develop new drug therapies. ICL, a partner company of Teleradiology Solutions and Telerad Tech is using its experience in Clinical Trial Imaging, Technology and Workflow development to offer a complete range of services in the Management of Imaging in Clinical Trials.

Exploring a need in the clinical trial space for an integrated image management company that has the resources and technology to offer optimal and cost efficient solutions to pharmaceutical, biotechnology, medical device companies and other organizations such as CROs, engaged in global imaging clinical studies.

The center specializes in clinical subspecialty imaging and also provided imaging-guided interventional radiological procedures whenever necessary.

Massachusetts General Hospital (MGH) in Boston has recently tied up with Teleradiology Solutions to provide 3D image post-processing services. As a result of the new collaboration, Massachusetts General Hospital will make available its proprietary 3D protocols to TRS. This will open up new opportunities in India as well as across Asia, Africa and other parts of the world as the technology and 3D post-processing...
