

India Engineering Works

<https://www.indiamart.com/india-engineering-works/>

Manufacturer of cross head bearings, big end bearings etc.

About Us

We are a group engaged in various fields of engineering services and have a background supported by 25 years of experience in carrying out repairs to worn out or damaged INDUSTRIAL & MARINE equipments. Guided with the experience and capability of Mr.Girish Singh Sani, we have achieved high standards in the production of large white metal and babbitt lined bearings. We have the ability to repair/reline worn out bearings as well as manufacture new bearings from prime grades of ferrous and non-ferrous outer castings. Our machining and testing facilities compare to the best in the industry. Remetalling equipment has been developed in-house for centrifugal lining of bearings upto 2 meters diameter.
