About Us

Industrial Engineering Corporation was established in the year of 1971. We are the Manufacturer, Supplier of Metal Bolts and Industrial fasteners. Industrial Engineering Corporation is on a 1,55,000 sq. ft. site in the Vasai suburbs of Thane, Maharashtra. The plant converts 8000 metric tons of steel per year into millions of fasteners. Fasteners prepared as per required standards have long been the product that IEC has been proudest to put its head mark on. IEC represents a benchmark in fastener quality and is considered the prime source of innovation and technology in India. As world markets continue to change and issue new challenges to India's manufacturing, so IEC evolves to meet those challenges and ensure that the brand maintains the highest levels of quality and satisfaction to its customers.

IEC has over 4 decades of experience in fastener preparation. The lessons learnt over this time now go into ensuring even the most complex fasteners are forged strictly in accordance with the specifications. One advantage is that the entire fastener - including the tool design, forging, heat treatment and plating is done under one roof. It is this level of scrutiny that results in high quality product. IEC is manufacturing and exporting wide range of fasteners such as Bolts, Nuts, Washers, Studs, Foundation bolts, Threaded bars, Sag rods, Tie rods, Clamps and other items conforming to rigid international standards such as DIN, ASTM, BS, ANSI, JIS, IS, AS and ISO. The...
