Infection Control India

https://www.indiamart.com/infection-control-india/

1. INFECTION CONTROL INDIA is an initiative by IIM lucknow alumnus to provide cost effective Infection control Services, NABH Consultancy and Marketing research solutions in Infection Control to Healthcare in India.
About Us

Healthcare in India is in a transformation stage with a shift in focus towards Private Hospitals. Hospital Set up is highly capital intensive. At the same time it is imperative to maintain quality as it directly affects patient lives.

The need for infection prevention: With evergrowing list of resistant bugs and threat of blood borne infections in Hospitals and Healthcare settings, it is imperative to have sound infection control practices. Good infection control practices not only saves lives but also saves cost to hospitals by the right utilization of resources.

Healthcare associated infection is a key factor determining clinical outcome among patients admitted in critical care areas. Surveillance of device-associated infections has become an integral feature of infection control in all hospitals. However in India hardly any legitimate data exists on incidences of health care associated Infection and little if any data exists on preventive measures.

INFECTION CONTROL INDIA is an initiative which intends to link up Healthcare set ups, to provide cost effective Infection control services through audits, Continuous Trainings and Seminars.

Our Experienced Clinical Microbiologists and NABH Consultants also provide Consultancy on NABH accreditation with special Emphasis on Infection Control.

In our endeavour to promote Infection Control practices. We also provide process improvement in Infection Control Practices...
