## About Us

We are about outstanding design and exceptional delivery. We believe people matter, and that strong relationships make for good architecture. We are professional, approachable and fun to work with. Innovative began in 2012 when its founder Mr. Abhishek Agarwal created architectural designs that satisfies the clients completely.

For us, every project is different, demanding a bespoke solution. We work from first principles, working closely with clients and communities. Through sustained research into local context and conditions we develop solutions that are unique to their time and place.

We innovate on all projects, involving only the most talented consultants, from the very start of the design process.

We pride ourselves in designing and delivering high quality bespoke buildings that respond to the unique demands of the client and context.

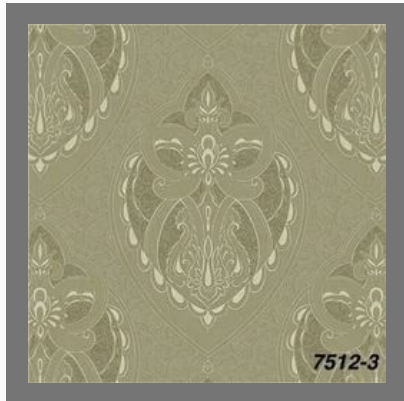

From start to finish of the development process, we leave nothing to chance.
