## About Us

Incepted in the year 1989, we have been serving various industries for more than 25 years. J.M. Engineer has been associated with the fabrication of process Equipments made from stainless steel, mild steel & aluminum and also catering to specialized casting requirements across India.

We are also the part of world's largest solar cooking project at Tirumala temple, Tirupati. By continually investing in equipment and facilities, we enable cost-effective designs for our customers and exacting tolerances. Advanced equipment allows us to reduce steps in fabrication, resulting in better pricing for our customers.

We give top priority towards producing qualitative range of products to the clients. For attaining this objective, we keep proper quality check points at required stages to ensure optimum performance standards as per clients' expectations.

We have range of innovation and concept research solutions. J.M.Engineer, integrates all stock holders (product managers, experts and customers/users). From the earliest stages of development, supports clients to make the right decisions with qualitative and quantitative research methods, J.M Engineer supports each step of development to determine the study approach that best meets the client's individual requirements. Our expertise ensures valid and marketable findings.
