About Us

- I have a very keen eye to detail and am suffering from an OCD. Obsessive Creative Disorder that is.
- So I never give up or take back my step unless I achieve the perfection in my design or satisfaction of my client. (*whichever comes the earliest)
- I love what I do. I don't procrastinate nor snooze when it comes to design.
- I adhere to standards and good practices. No design leaves my desk without passing a QA.
- My designs follow dimensions, all my designs can be measured to a geometry.
- My design breaks rules to satisfy my customer and their business.
- I am single. No distractions or Deviations.

Now that you'd have wondered about the terms Dimensions, QA, Detail, Standards etc. struggling to mingle to my creative profile in the answer above and before you raise a question about my qualification, I want to answer by admitting that I was born in Chennai, India and I am a godforsaken Engineer & I think that sums up all of my creativity, eccentricity, my passion towards design, my humor(if any) and my qualification to design. Let's do some business, shall we?
