# Khoj Alloys

<https://www.indiamart.com/khojalloys/>

We are the leading Manufacturer and Supplier of high quality Pulley and Metal Wheel. These products are used in various industrial machines like hydraulic equipment, automobiles, generators, diesel engines, earth moving equipment, cranes, etc.

## About Us

Established in the year **1970** at **Jaipur (Rajasthan, India)**, we “**Khoj Alloys**” are a leading **Manufacturer** and **Supplier** of a superior quality range of **Pulley** and **Metal Wheel**. We manufacture these products using excellent quality metal alloy with the help of advanced technology in adherence with set industry standards. The offered products are highly appreciated for features like high strength, vigorous construction, accurate dimensions, corrosion resistant finish and durable finish standards. These products are available with us in various specifications to meet different needs of our clients. As a quality oriented organization, our professionals work in conformity with the set quality standards. Our quality experts conduct various quality checks to make certain that products offered by us are perfect in all conditions.

We have developed a hi-tech infrastructure facility that is well-equipped with all the required manufacturing technologies and machines. Our infrastructure facility facilitates our skilled professionals to manufacture these products in various specifications. We have divided our infrastructure facility into various units such as production, quality testing, research & development, warehousing & packaging, etc. These units help us in carrying out our business operation smoothly. Also, we are backed by a team of experienced professionals, which certainly meets the exact requirements of...
