A leading organization, we are engaged in manufacturing and supplying PET & PVT Monofilaments and Synthetic Bristles. These cost effective products are known for eco-friendliness, easy to use and anti-bacterial properties.

## About Us

Established in the year **2010**, we “Kunal Polymers” are a prominent manufacturer and supplier of PET & PVT Monofilaments and Synthetic Bristles. These eco-friendly, easy to use, and anti-bacterial products find wide applications across various industries such as electronics, chemical, pharmaceutical, and beverage. Further, these are also known for durability, cost effectiveness, and high performance. We have been able to grow leaps and bounds within a minimum time with the help of our sophisticated facilities. This further allows us to meet the customized demands of our clients. In addition to this, our professionals with immense technical know-how and deep knowledge are able to comprehend the intricacies of the domain and thereby, enable us to meet the industry demands effectively. With the visionary approach and positive guidance of our mentor, “Mr. Pradeep Jain”, we have been able to reach the heights of success. The success is further apparent from the esteemed clients including Kripal Brush, Delhi, Delco International, Delhi, Winledon, Muradabad, and Bristles Works, Kanpur.
