About Us

Light Concepts is a leading Domestic, Industrial and Commercial Energy Saving Solution Provider. With Power tariff's shooting through the roof and Governments struggling to provide adequate power to the masses, the key lies in using power efficiently and saving when not required. We take a three pronged approach to Energy Saving:

1. **Energy Conservation:** This means saving energy on our existing Lighting set up, when not in Use. This can be done by using Lighting Control Systems like dimmers, Occupancy Sensors, Daylight sensors etc. We can save upto 60% in power bills by conserving energy. Your home and your workplace should be designed to complement your needs. As your needs change throughout the day, your lighting should adapt as well, bright to read a book, but dim for computer use. Whether you are at home or at work, Our solutions provide convenient access to light control, creating a comfortable atmosphere to support your activities throughout the day.

2. **Energy Efficiency:** This means using energy efficiently by changing our existing High wattage lighting fixtures with energy efficient state of the art LED Lights. By shifting to LED Technology we can Save upto 70% in Power Bills. We offer LED Based Lighting Fixtures, In Tune with the Global Trends Conforming to the Green, Environment Friendly and Non Polluting Global Trends. The advantages of Shifting to LED are numerous, Like:

a. **Energy efficient** -...
