About Us

LogicalDNA is a software products and services company with more than a decade of experience. We successfully develop world-class, robust, cost-effective products with unmatched technology and competence. We adopt the most relevant, advanced technologies to deliver a full range of software development and software programming services. We are skilled in software development, .Net, PHP, Content Management Systems (CMS) including portals and frameworks, Joomla, Drupal, Liferay Portal, OSCcommerce, Wordpress, dotCMS and many other disciplines. We leverage the latest technology and toolsets to design, develop and maintain the best products for clients and partners alike. [read more](#)
