About Us

LumaSense Technologies, Inc. was founded in 2005 as the world's first company to focus exclusively on reducing inherent inefficiency and preventable waste across our planet's most resource-intensive global industries. Guided by a strong set of values, we deliver solutions to detect, reduce, and prevent inefficiency and waste in the Global Energy, Industrial Materials, and Advanced Technologies markets.

LumaSense enables customers worldwide to achieve predictable, verifiable and sustainable improvements in process efficiency and waste reduction. These customers operate processes that include generating and transmitting electricity; oil and gas refining; processing industrial materials; and manufacturing advanced technologies such as semiconductor, wafers, and LEDs. LumaSense gives our customers a competitive edge by awakening their 6th sense.

In addition to expecting and receiving the highest quality products, our customers turn to us, because they know our commitment to their success comes first. With expert application understanding and a broad portfolio of offerings, we utilize our proven 6 step process to help our customers gain a competitive edge.

We are unrelenting in our drive to find better ways. We strive to give our customers a competitive edge by awakening their 6th sense and help them directly improve their bottom line.
