We are one of the prominent trader, exporter and supplier of various types of Engineering Products for Robotic Institutes. These products are durable, easy to install and have long service life.
About Us

Established in the year 2007, we, “Macnet Technology” are one of the leading manufacturers and suppliers engaged in offering Engineering Products for Robotic Institutes. These products are offered to the clients under the brand name of VegaROBOKit. Our products are known for sturdy construction and durability. We also offer these engineering devices in various specifications, which meet the industry demands. Our products are used in electronics, robotic and engineering industries across the country.

We have a vast distribution network, which help us in delivering these products timely to the clients. Our association with various transport agencies enables us to keep our delivery commitment. Owing to our hi-tech devices, we have gained many prominent customers across the country. Presently, we are catering to needs of many prominent clients from different sectors.

Our mentor “Mr. Ajit Vira” is a man with vast industry experience and sharp business acumen. He has helped us in handling large business projects and in attaining desired results.
