SIGNAGE is based on 25 years of manufacturing experience that blends together our commercial, technical and manufacturing know how.

About Us

SIGNAGE is based on 25 years of manufacturing experience that blends together our commercial, technical and manufacturing know how. Keeping in pace with the technological developments we have been constantly upgrading our manufacturing facilities at par with Europe and Far East Countries to bring the best quality at the most economical prices.

Service Orientation is something that has been instilled into every single employee at SIGNAGE and we believe that happier your task force, the better the job done. All our employees understand how much importance is due in this area of our business.

The world is on its way to becoming a global village. With Computers in every corner and phones in everyone's hands, business has taken a giant leap in the world today. But, what happens when people start talking more to a computer than to the person himself? At SIGNAGE, we realize that without our customers we would cease to exist. We understand that it is essential in today's world to merge the old fashioned etiquettes like a good old strong handshake with the fast paced technology. We strive to know our customers by first name to ensure that we meet their needs in a quicker and more effective manner.

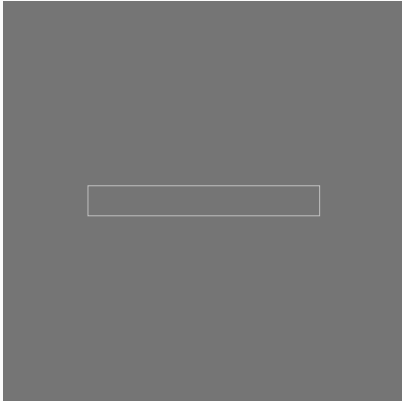

We are strongly against the 'Railway relationship'. When you enter SIGNAGE, you not only buy a ticket and finish the journey, you get off at your destination with full support all the way. This is because a BAND AID is never as good...
