About Us

Education should always be purposeful, growth oriented and productive. But Technical institutes are failing to produce dynamic and enterprising youngsters capable of facing the changing times and taking on the toughest technical challenges. Academic Qualifications no longer define the worth and expertise of a candidate and prospective employers are no longer looking at mere qualifications but at the employ-ability potential of the candidate. Hence our emphasis is on how best to integrate industry relevant skill set and regular college curriculum and expose trainee to real workplace culture. The need of the hour is a sustainable platform to hone the skills of trainee and provide the support each individual needs to grow. A well defined solution is the establishment of Daksh Skill Development Center (DSDC) by Shri Krishna Guru Memorial education society (SKGM).
